SUMMARY

PMP-certified program manager and systems architect with 15+ years delivering enterprise platforms for the Department of Defense, state government, and B2B clients. Led a global DoD identity platform serving 16M+ users across 500+ military installations. Now building AI-native B2B SaaS platforms end-to-end — architecture, delivery, and full-stack engineering — using LLM orchestration, agentic workflows, and structured human-AI pipelines.

EXPERIENCE

Founder & Principal Engineer
Jan 2025 – Present

Q7Core · Sacramento, CA

- Designed and operate an AI-augmented engineering pipeline — AI-assisted architecture, Linear sprint management, Notion documentation, GitHub code — with structured handoffs between human review and autonomous AI execution.
- Built multi-tenant B2B SaaS platforms integrating real-time government APIs, AI-driven document extraction, and automated permit lifecycle tracking across multiple municipal jurisdictions.
- Architected a local-first AI desktop client with multi-model LLM routing (400+ models), BYOK key management via OS keychain encryption, and a developer-grade request/response inspector.
- Built an autonomous AI agent with persistent vector memory executing scheduled intelligence-gathering workflows.
- Developed AI-powered intelligence pipelines that analyze unstructured media and convert extracted concepts into structured development and planning workflows.

Senior Advisory Consultant
Nov 2022 – Jan 2025

SharpSwitch · Remote

Technical and strategic advisory for B2B SaaS product planning, architecture, and technology selection, supporting early-stage platform design and go-to-market strategy.

Program Manager
2016 – 2022

Defense Manpower Data Center (DMDC) · Department of Defense · Monterey, CA

- Directed modernization of a global DoD identity verification and physical access platform — **500+ military installations**, **16M+ enrolled users**, **1M+ daily secure transactions**.
- Led 50+ cross-functional staff across concurrent Agile workstreams. Authored the program charter securing multi-year funding for platform modernization.
- Expanded platform across all U.S. military branches and Coast Guard (DHS). Integrated FBI TSDB, NLETS, and IoLS for real-time threat vetting.

Principal Architect / Sr. Software Engineer
2011 – 2016

Defense Manpower Data Center (DMDC) · Department of Defense · Monterey, CA

Led architecture modernization from legacy monolith to SOA (C#, .NET, SQL Server, Entity Framework). Designed secure APIs connecting biometric stations, access control hardware, and centralized identity databases across DoD networks.

KEY ACHIEVEMENTS

Global DoD Identity Platform
Led modernization of a worldwide identity verification platform supporting all U.S. military service branches — 500+ installations, 16M+ users, and 1M+ daily transactions.

AI-Augmented Systems Engineering
Designed hybrid human-AI development pipelines integrating LLM tooling, automated task execution, and structured review workflows to accelerate complex engineering projects.

Enterprise Platform Modernization
Led architectural modernization initiatives transforming legacy systems into modular service platforms with secure APIs, distributed processing, and cloud-ready infrastructure.

Document Intelligence Automation
Developed multi-stage AI pipelines for extracting structured data from complex documents, enabling scalable onboarding and operational workflows.

SKILLS

PROGRAM MANAGEMENT
Agile/Scrum, Waterfall, Risk Management, Stakeholder Alignment, Roadmap Definition, Budget Oversight, Cross-Functional Team Leadership, Vendor Management, Delivery Planning, Executive Communication

ENTERPRISE DEVELOPMENT
C#, .NET Core / .NET Framework, SQL Server (T-SQL, SSIS, SSRS), Entity Framework / LINQ, Azure DevOps / TFS, REST APIs, Microservices, SOA, Systems Integration, Secure API Design

AI & MODERN STACK
LLM Orchestration, Agentic AI, MCP, RAG / Vector Search, Vision AI, Python / FastAPI, SvelteKit 5, React / Next.js, Supabase / PostgreSQL, Rust / Tauri 2, Docker, AI Workflow Automation, Prompt Engineering

CERTIFICATIONS

Project Management Professional
